

How to view the photo albums

Last Updated Friday, 24 March 2006

When you click on the Photo Albums link on the main menu, you will see some public albums that show some Group weekends and activities. Each album has a 'highlight' photo, which is like an album cover picture'. Click on the 'highlight' photo to see the photos in the album. Click on the small 'thumbnail' photo to see a larger version.

When you are viewing the large size pictures, you can get back to the 'thumbnail' view by clicking the Back button in your web browser. Alternatively, you can go directly to other full size pictures by clicking the Next or Previous links above or below the picture or by selecting from the list to the left of the picture.

If you are a member

If you are a member and you log in, you will see the public albums and also some members' albums. There will normally be several pages of albums so you need to click on number 2, 3, etc. at the bottom of the page to see the other pages of albums.

The albums with the most recent additions appear first. The album details tell you how many items are in the album and how many times the album has been viewed. Click on the highlight picture of the album to go into that album.

When you go into a member's album, you should see one or more small 'thumbnail' photos. These could be individual photos or they could be the 'highlight' photos of sub-albums. If they are photos then clicking on them will show the full size version. If they are sub-albums, then clicking on them will show more 'thumbnail' photos inside. You can then click on one of these to see the full size version.
